

Precision Series Joysticks For Telehandler Applications

Sure Grip's Precision Series joysticks set the standard for electronic controls in the telehandler vehicle market, delivering smooth, precise equipment control.

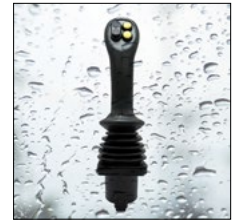

Maximum Operator Efficiency

With an ergonomic handle and buttons that provide positive tactile feedback, The Precision Series features high resolution joysticks and faceplate controls for precise placement. Flexible mounting options and a narrow base make it easy to use the joysticks in a wide variety of cab designs.

Rugged, Long-Lasting Performance

The fully-sealed and impact-resistant Precision Series joysticks are certified to IP67. Rated for -40°C (-40°F) to 85°C (185°F) operation, the joysticks are designed to withstand even the most extreme conditions for up to 5 million cycles (20 million operations).

Want to put the Precision Series Joysticks to the test?

Sure Grip delivers on your production needs with the fastest lead times in the industry. **Contact us today to see why there's nothing we can't handle!**

Designed Specifically for Telehandlers

Precision Series joysticks feature the right combination of buttons, sliders and rockers suitable for a wide range of telehandler designs. The Precision Series features high resolution joysticks and faceplate controls for precise placement.

Take Control with Precision Series Joysticks

High resolution joystick and faceplate controls for precision placement

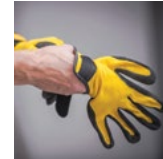

Reliable operation, tested to over five million cycles

High-impact, plastic polymer control handle that's tough, lightweight and easy to use

Fully sealed to IP67, chemical and UV resistant handles prevent degradation in the most extreme environments

Intuitive controls with large tactile buttons provide positive response when pressed, even while wearing gloves

Fade free performance enabled by contactless Hall sensor technology keeps joystick operation smooth and reliable over extended use

Compact joystick base with a minimal footprint fits in the tightest spaces

Fast and simple, plug-and-play installation using an integrated Deutsch connector
